COMMERCIAL MATHEMATICS

COURSE OUTCOMES

After Completion of this course the outcomes will be as follows

OC1: differentiate between commission and brokerage and apply appropriate calculation methods in various scenarios.

OC2: understand the concepts of trade discount, cash discount, and their implications on profit and loss calculations in business transactions.

OC3: apply the principles of profit and loss sharing in partnership agreements.

OC4: gain a comprehensive understanding of shares, including their types, valuation methods, and implications for investors.

OC5: analyze mutual fund investments, calculate net income considering various factors, and make informed investment decisions.

OC6: develop proficiency in averaging prices under SIPs and understand its significance in long-term investment strategies.

COMMERCIAL MATHEMATICS-II

COURSE OUTCOMES

After Completion of this course the outcomes will be as follows

OC1: Calculate simple, compound interest for various scenarios and to compute EMIs using both reducing balance and flat interest systems.

OC2: Determine the present and future values of annuities and apply this knowledge to financial decision-making.

OC3: Understand the relationships between demand, supply, and market equilibrium, and interpret them using mathematical models.

OC4: Develop graphing skills to visually represent economic relationships and analyze their implications.

OC5: Formulate linear programming problems and apply appropriate techniques to find optimal solutions, facilitating efficient resource allocation and decision-making.

BUSINESS COMMUNICATION SKILLS

After Completion of this course the outcomes will be as follows

OC1: Understand the basics and significance of business communication theory.

OC2: Adapt to and use digital communication methods for personal and business purposes.

OC3: Grasp and effectively use the nuances of verbal and non-verbal communication.

OC4: Improve their skills in business correspondence.

INTRODUCTION TO BUSINESS

After Completion of this course the outcomes will be as follows

OC1: Learners will recognize the fundamental components of the business

OC2: Learners will be able to apply theoretical knowledge to real world scenarios within the Business Environment.

OC3: Learners would understand the concept and importance of project planning and would get hands on through case studies

OC4: To create comprehensive understanding among the learners about Business Strategies

INTRODUCTION TO SERVICE SECTOR

After Completion of this course the outcomes will be as follows

OC1: Learners will be familiar with the concept and the importance of the service sector

OC2: Learners will be able to get acquainted with the recent trends in the service sector

OC3: Learners would understand the concepts of retailing, retailing format and retail scenario through case studies

OC4: To create broad understanding among the learners about E-Commerce

INTRODUCTION TO CULTURAL ACTIVITIES

After Completion of this course the outcomes will be as follows

OC1: Understand the significance of cultural activities.

OC2: Sensitize students towards Indian culture and its preservation.

OC3: Apply the knowledge and skills of the cultural activities in their practical life.

OC4: Participate in the various cultural activities.

FOUNDATIONS AND EXPLORATIONS OF PERFORMING AND FINE ARTS

After Completion of this course the outcomes will be as follows

OC1: Identify and trace the historical evolution of Indian performing & fine arts.

OC2: Analyze the traditional and modern art forms in performing and fine arts.

OC3: Identify and describe a range of career paths in the performing & fine arts.

ECONOMICS FOR PROFESSIONAL CAREERS-I

After Completion of this course the outcomes will be as follows

CO1: Remembering the meaning, scope and importance of concepts used in the economics.

CO2: Understanding the role, problems and types of concepts used in the economics.

CO3: Applying the determinants of demand, supply.

CO4: Analyzing the consumer's behavior.

ECONOMICS FOR PROFESSIONAL CAREERS-II

After Completion of this course the outcomes will be as follows

CO1: Demonstrate a comprehensive understanding of cost, revenue, and production concepts, including short-run and long-run costs, average and marginal costs, and the laws of production.

CO2: Analyze and compare different market structures incorporating the principles of game theory to understand competitive dynamics.

CO3: Apply knowledge to determine prices in various market structures, evaluate market equilibrium, and assess social efficiency, showcasing the ability to analyze and predict economic outcomes under different competitive scenarios.

CO4: Develop proficiency in determining price and output levels under diverse market forms, demonstrating a practical understanding of how market forces influence economic decisions and outcomes.

INTRODUCTION TO SPORTS, PHYSICAL LITERACY, HEALTH & FITNESS AND YOGA (SEMESTER 1)

After Completion of this course the outcomes will be as follows

CO1: Student will learn to apply knowledge of Physical fitness and exercise management to lead better quality life.

CO2: Students will understand and learn different dimension of active life style.

CO3: Student will learn the knowledge of nutrition and diet.

CO4: Students will be able to assess the physical fitness in a scientific way.

CO5: The students will be able to continue professional courses and research in Physical Education, sports and yoga.

INTRODUCTION TO SPORTS, PHYSICAL LITERACY, HEALTH & FITNESS AND YOGA (SEMESTER 2)

After Completion of this course the outcomes will be as follows

CO1: Students acquire the knowledge of Physical Education, Sports and Yoga and understand the purpose and its development.

CO2: The student learns to plan, organize and execute sports events.

CO3: Student will learn theoretical and practical aspects of game of his choice to apply at various levels for teaching, learning and coaching purposes efficiently.

CO4: Student acquires the knowledge of opted games, sports and yoga and also learns the technical and tactical experience of it.

CO5: Student will learn to apply knowledge of Physical fitness and exercise management to lead better quality life.

ENVIRONMENT MANAGEMENT & SUSTAINABLE DEVELOPMENT

After Completion of this course the outcomes will be as follows

CO1: Use principles of Environmental Science for explaining sustainable development and its related ethical concerns

CO2: Display scientific perspective for issues confronting our present day environment.

CO3: Analyze the national and global environmental issues relating air, water, soil, and land use, biodiversity, and pollution.

CO4: Explain the Role of an individual in relation to human population and environmental pollution.

CO5: Recognize the importance of collective efforts for environmental sustainability as reflected in various treaties, conventions and laws

FUNDAMENTAL OF BUSINESS-I

After Completion of this course the outcomes will be as follows

CO1: Learners will recognize the fundamental concept of the business and CSR

CO2: Learners will be able to apply theoretical knowledge to real world scenarios within the Business Environment.

CO3: Learners would understand the concept and importance of project planning and would get hands on through case studies

CO4: To create comprehensive understanding among the learners about Entrepreneurship

INDIAN KNOWLEDGE SYSTEM

After Completion of this course the outcomes will be as follows

CO1: The course will help students to understand India's rich cultural heritage

CO2: Students will understand the traditional wisdom with modern education which will give them immense pleasure and pride.

CO3: Students will develop valuable scientific insights in field like Mathematics, Astronomy, Medicine, Yoga, Ayurveda etc.

CO4: Students will also learn the importance of environmental conservation and sustainable development.

INDIAN KNOWLEDGE SYSTEM (MINOR)

After Completion of this course the outcomes will be as follows

CO1: Learners will recognize the fundamental concept of the business and CSR

CO2: Learners will be able to apply theoretical knowledge to real world scenarios within the Business Environment.

CO3: Learners would understand the concept and importance of project planning and would get hands on through case studies

CO4: To create comprehensive understanding among the learners about Entrepreneurship

INTRODUCTION TO NATIONAL SERVICE SCHEME

After Completion of this course the outcomes will be as follows

CO1: The course will help students comprehend the foundations of the National Service Program.

CO2: To understand the unique camping program.

CO3: Students will learn about the regular activities of NSS.

LEADERSHIP AND COMMUNITY ENGAGEMENT

After Completion of this course the outcomes will be as follows

CO1: The course will help students to enhance Leadership qualities & to develop Personality

CO2: Inculcate Universal Human Values and Ethics for youths Sustainable Development

CO3: Students will learn about activity Based Programmes and make a detailed report.

CO4: Students learn to value the labour (Shramadhan)
