SPORTS DEPARTMENT PRESENTS
“MOHARA”
INTRA-COLLEGIATE MEGA CHESS TOURNAMENT 2024-25
ON OCCASION OF “WORLD CHESS DAY”

INTRODUCTION

Chess is one of the oldest board games that is believed to be originated in India and is now played worldwide. It is a 2-player strategy game that is played by millions, making it one of the most popular games in the world. Speaking in numbers, Chess is played on 64 squares, with 16 (8 pawns, 2 knights, 2 bishops, 2 rooks, 1 queen, and 1 king) pieces for both the black and white player, whose goal is to corner the King and deliver checkmate. Chess is known to improve cognitive thinking, memory power, self-confidence, critical & logical thinking, and many other life skills.

BENIFITS OF CHESS

Chess Helps You Focus:-

As Bobby Fischer said, "[Chess demands total concentration.](#)" A chess player can make moves like a grandmaster for 30 moves and then get distracted on move 31 and make an elementary blunder that can make the blunder lose the game! This intense focus is useful in everyday life when confronted with assignments, daily tasks, and deadlines.

Chess Helps To Develop Creativity:-

They say a persons' personality comes out in their chess game. A shy and passive person might play more reservedly while an outgoing and social person might be a bold attacker. The wonderful part of chess is that there is room for everyone's styles and personalities. In your own personal way, you can show your creativity in the type of moves, plans, and tactics that you come up with on the board.

Chess Builds Confidence:-

Chess is - all you put in the time studying! You put in the time competing in tournaments! You spend the time analyzing your losses and finding your weaknesses.

With all a sense of confidence is developed in the players. Even working through a tough period where you plateau in your chess development – it can help to build resilience and confidence.

Chess Helps Develop Problem-Solving Skills:-

In every chess game, you are faced with challenges and problems that you have to solve in order to play your best game. Chess can help you to think ahead, not rush your decisions, and weigh the pluses and minuses of your choices. This correlates to challenges we face in everyday life, and just as in chess, we try to make the best choices to develop positive outcomes for our lives.

Chess Helps You Learn How To Be Calm Under Pressure

An intense game of chess where you have given everything, your time is running low, and you still have to make critical decisions to bring the point home teaches us to remain calm under pressure. You have to be intensely focused, while at the same time remaining calm so that your brain can work to its maximum. We are all faced with deadlines, presentations, interviews, and tests throughout our life. Just as in a chess game, we have to remain confident and calm to perform our best.

THE EVENT WAS ORGANISED AS FOLLOWS
